

## Confession

### "Wireless World"

Visit "[Wireless World](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Open your door to your wireless world, and see the monster you created.  
Open your eyes to the pain that lies inside. where ya gonna run where ya gonna hide.  
If ya think technology is gonna save your life, ya better start diggin your grave tonight.  
Because all the people ya think have all the answers, are just the ones who built the question.

There's no room for apathy, because time is running out.  
Yeah we gotta act now.  
There's no room for mistakes, because we only got one chance.  
Yeah we gotta get this right.

Take a look around, can't you see the problem now...yeah it's all gonna come crashing down.  
There inventions haven't brought us a perfect world. They only created hell on earth.  
Gotta make a stand now 'cause there will be nothing you can do. When it all backfires on you.  
Its not a question of if, it's a question of when, and maybe tomorrow will be the end.

There's no room for apathy, because time is running out.  
Yeah we gotta act now.  
There's no room for mistakes because we only got one chance.  
Yeah we gotta get this right.
