"Holly Blue"

I was walking with the sun this morning
- Youâ€™ll try to find a way
I am thinking how to be happier
- Youâ€™re not sure of what you say

My head stops to think and I know I will end
Near to my castle, leaning on its walls
Thousand of memories come to my brain
And in my soul there's still a hole

Stars appearing and raindrops start falling
- You will have to come back home
I'll start to write a new song early
- Music is your salvation

And when I'm feeling gloomy and depressed
I need so much to play my guitar
I gently caress her with my hands
She makes me laugh, she doesn't like to see me sad

And I'm sure without music maybe Iâ€™d die
And without my Holly Blue I'm going crazy
'Cause I need rhythms and melodies to survive
I have no words, it's amazing
