Verse 1:

It hit me like a hammer, came out of the blue
What the hell did you think you'd do
So unexpected I wasn't prepared
So many great times moments we shared

Chorus:

We had it good, we had it bad
But now with you gone I'm no longer sad
After all that happened I look to the stars
And all I can say is you left no visible scars

Verse 2:

It must've been so good cause you left me so fast
I don't even care now I hope it will last
I feel rejected but I'll be all right
A memory so sweet for the rest of my life

Chorus:

We had it good we had it bad
But now with you gone I'm no longer sad
After all that happened I look to the stars
And all I can say is you left no visible scars

Bridge:

None that anyone could see
I gave you all inside me
What we had was a lie
All the promise, but now we must say goodbye

Chorus:

We had it good we had it bad
But now with you gone I'm no longer sad
After all that happened I look to the stars
And all I can say is you left no visible scars
