You're so beautiful in the morning
Pure and naked without care
The vision takes me without a warning
Your shoulders curtained by your hair

Come here and get back under cover
Let's just call in sick today
Let's pull the phone out of the wall
And let the whole world go away

I wanna stay here just like this
For another second or so
I wanna fill you with my kiss
And never let you go

I wanna hold you in my arms
I wanna taste you with my breath
I wanna stay like this forever
Nothing less

Let's stay in today
There is nothing as important
As being with you this way
Let's stay in today
It's a need that I am feeding
With the things I'm trying to say
So baby, let's stay

Let's not talk about tomorrow
Let's talk less about the past
Girl, there's no time for fear or sorrow
Let's just make the moment last

I wanna keep you just like this
I need to let you know
That every second here is bliss
I'll never let you go

Don't ever let this moment end
Let's stretch it out into the day
Come on, let's become kids again
Let's hide and seek, let's kiss and play

Let's stay in today
There is nothing as important
As being with you this way
Let's stay in today
It's a need that I am feeding
With the things I'm trying to say
So baby, let's stay

Nothing lasts forever
I heard somebody say
And if it's really true, then
We ought to seize the day
Once in a lifetime someone
Can make you feel this way
This is our moment, so let's
Just not go out today

Let's stay in today
There is nothing as important
As being with you this way
Let's stay in today
It's a need that I am feeding
With the things I'm trying to say
So baby, let's stay

I wanna hold you in my arms
I wanna taste you with my breath
Don't ever let this moment end
I wanna stay here just like this

I wanna hold you in my arms
I wanna taste you with my breath
Don't ever let this moment end
I wanna stay here just like this
