"When The Top Comes Off"

Visit "[When The Top Comes Off](#)" on motolyrics.com

holes poked in the plastic top air for us to breathe just
enough light filters in for ernie, eb and steve they say
that when the top comes off the light's too bright to
take and what you see can frighten you there's been
talk about a lake and if you get to see too much you're
lifted from the dirt and run right through the length of
you some say that it hurts stay away from the light try
to keep out of sight the one on top died of fright i sure
hope the fish don't bite ...when the top comes off.
