### LEAD YOU TILL THE END

There are times when we all have reasons  
We all have courage  
We all have strength to carry on  
All we need is a fresh dew anointing  
To lead us all the way  
Just call on him now and believe

Should we hold unto sin until?  
Grace will abound  
Just because we have a friend who loves us  
We need to make him pleased with our lives  
By holding to his words and sing

We have a friend who can lead us to  
He don't care about what you've done  
If you'll only trust in him  
He will lead you to the end  
No matter what you're going through  
That's when he'll show himself strong  
If you'll only trust in him  
He will lead

CHORUS: We have a friend who can lead us to the end  
He don't care about what you've done  
If you'll only trust in him  
He will lead you to the end  
No matter what you're going through  
That's when he'll show himself strong  
If you'll only trust in him  
He will lead you to the end

ooooh.....oooooh .....I know He will lead you till  
the end...yea

Weeping may endure for a night  
But joy comes in the morning  
If you'll only trust in him  
He will lead you to the end  
you can get the best of you  
You can be the best you can

You can still cross over  
Just get closer to him  
Friend who loves all times  
Always thinks about you  
Who will always care  
Who will always be kind  
You can never be alone  
You will always ride with him  
In the train that leads to peace and love and joy and  
happiness  
We have a friend who can lead us to the end  
He don't care about what you've done  
If you'll only trust in him  
He will lead you to the end  
No matter what you're going through  
That's when he'll show himself strong  
If you'll only trust in him  
He will lead you to the end  
(chidi Joe) oohh He can lead us to the end  
He don't care about what you've done  
If you'll only trust in him  
He will lead you to the end  
Ain't no matter what you're going through  
That's when he'll show himself strong  
If you'll only trust in him  
He will lead you to the end
