When first we met, complete awkward strangers
We did not know if we could be friends
How soon we've come for to know each other
And now I know we will meet again

Chorus:

So here's to you and our time together
I'll share with you a parting glass
And I'll bid adieu with some smiles and laughter
Our time apart will be short and pass

We've talked of dreams and of new tomorrows
Of yesterday and it's dark despair
We've had our share of love and sorrow
And now we part as friends who care

So here's to you and our time together
I'll share with you a parting glass
And I'll bid adieu with some smiles and laughter
Our time apart will be short and pass

A long, long road, it lies before me
And fate will take me where it will
But through the valleys and over mountains
I'll not forget, but remember you still

So here's to you and our time together
I'll share with you a parting glass
And I'll bid adieu with some smiles and laughter
Our time apart will be short and pass

So here's to you and our time together
I'll share with you a parting glass
And I'll bid adieu with some smiles and laughter
Our time apart will be short and pass
