God given time

Nothing's gonna be, is it ever gonna be
The same again 'cause I don't wanna feel the same
again
Would be the same again the same again the same
again
Again

I hope that it won't be, hope it is never gonna be
Experiencing love can turn your mind to hate
Before your see
And this is what it's like
And how it feels to me

I know experiencing love can turn your mind
To hate before you see
I know the experience of love and this is how it feels to
me

This is the part of our short lives where we got
This world in our hands
We're gonna take it and you can't fake it,
A person I once called a friend

Nothing's gonna be, is it ever gonna be
Experiencing love can turn your mind to hate
Before you see
And this is what it's like
And how it feels to me

I hope that it won't be, hope it is never gonna be
The same again 'cause I don't wanna feel the same
again
Would be the same again the same again the same
again
Again

I know experiencing love can turn your mind
To hate before you see
I know the experience of love and this is how it feels to
me

This is the part of our short lives where we got
This world in our hands
We're gonna take it and you can't fake it,
A person I once called a friend
All the things we said, I'm just hoping that
Love did not turn your mind to hate
Believe in what you are, be your guiding star
Don't let love turn your mind to hate

Nothing's gonna be, is it ever gonna be
The same again 'cause I don't wanna feel the same
again
Would be the same again the same again the same
again
Again...again
I hope that it won't be, hope it is never gonna be
Experiencing love can turn your mind to hate before
You see but this is what it's like and how it feels to me
I know
Experiencing love can turn your mind to hate before
You see
I know experience love and this is how it feels to me

This is the part of our short lives where we got
This world in our hands
We're gonna take it and you can't fake it,
A person I once called a friend

Nothing's gonna be, is it ever gonna be
Experiencing love can turn your mind to hate before
And this is what it's like
And how it feels to me
I hope that it won't be, hope it is never gonna be
The same again 'cause I don't wanna feel the same
again
Again...again

This is the part of our short lives where we got
This world in our hands
We're gonna take it and you can't fake it,
A person I once called a friend

All the things we said, I'm just hoping that
love did not turn your mind to hate.
Believe in what you are be your guiding star,
Don't let love turn your mind to hate.
