(20 thousand years to the future)

Catch me if you can
Ain't nothing like me in the air
Catch me if you can
Ain't nothing like me in the air

Don't need no battery operating lover
When you're with me
They're obsolete

I'm the future I came down for you 'cause I love ya
If you believe
I got to leave

Now we're close in like to realize that this ain't over (?)
And it's almost like before
So we're off to Mars
We're not afraid anymore

Cause we don't belong,
We're aliens here
But I know a place where we can love without fear
I'm taking you home 100 lights years
Let me take ya take ya to the future (oh oh oh)
Let me take ya take ya to the future (oh oh oh)

In another galaxy i can be your lover, easily
I'm all you need
Hey the tip of the Milky Way is waiting for you
So follow me if you believe

Now we're close enough to realize that this ain't over
And it's almost like before
So we're off to Mars
We're not afraid anymore

Cause we don't belong,
We're aliens here
But I know a place where we can love without fear
I'm taking you home 100 lights years
Let me take ya take ya to the future (oh oh oh)

Let me take ya take ya to the future (oh oh oh)

Purple Stairs
Ship lifting off
Climb aboard
Destination and Returning
Navigation
Set the Engine Burning

Ain't nothing like me in the air
Catch me if you can
Ain't nothing like me in the air
Catch me if you can

Cause we don't belong,
We're aliens here
But I know a place where we can love without fear
I'm taking you home 100 light years
Let me take ya take ya to the future

Cause we don't belong
We're aliens here
But I know a place where we can love without fear
I'm taking you home 100 light years
Let me take ya take ya to the future
Let me take ya take ya to the future

(The final decade of the of the 20th century
Men and women in rocketships landed on the moon}

Let me take ya take ya to the future
