"Forgotten Plague"

Visit "[Forgotten Plague](#)" on [MotoLyrics.com](#)

Alter all traces of life have disappeared forever
Nobody left alive, no one to remember

This forgotten barren wasteland
Forgotten plague upon it

Failed, forever doomed into emptiness never to return
again

Hope is a false illusion
Nothing can save us from our fate

Damned, consumed by misery eternally never to awake
again

If this life is so useless,
Soon to be abolished
Why, do we exist in the first place?
A mistake, a plague, an accident
Death is the only constant
Our only escape, yet the same...
