dead people in your body bags  
rotten prepared for the ritual

rancide meat dripping of liquefied flesh  
ideal material for the sacrifice  
on your altar built of gave stones and human bones

intercourse whith purulent remains  
ejaculate to spice the gift

plastic bag full of genitals  
severed to pleased your carnal god

the altar  
what ambition drives the mortal  
but ambition itself

your ambition is to kill  
for your own god

ruptured giblets full of flies  
decomposed parts upon the altar

purified but only when putrified  
you feed your god, through your mouth

miko "lead"  
the altar of angel fallen  
you live for it, and it lives through you  
twisted religion based on pus and blood  
to please the insane god of putridity
