One of these days I'm gonna find me someone to shine
with
'Cos you radiate nothing

You walk around with your dirty old crown
Your pride, you never swallow it
You think you own this town
Well, maybe you did but I just didn't follow it

It's written all over your face
This is not your place and you just won't admit it
The foot candles that you stood in,
They are now so dim and you just have to quit it
The spark is over and now you radiate nothing

One of these days I'm gonna find me someone to shine
with
'Cos you radiate nothing

The flashy friends you have
They never planned to stay up and clean the mess
Illumination's bad
If it makes you see the burning ends

And now you think you can get up
Can't even sit up to this day and day
No one gives you attention to the convention
Of the loosened things you say
The spark is over and now you radiate nothing

One of these days I'm gonna find me someone to shine
with
'Cos you radiate nothing

One of these days I'm gonna find me someone to shine
with
