Bright lines are placed in order  
To start your sick mind disorder  
Close your eyes and fit your noose  
Use your lung to pull the trigger

The bullet has taken its way  
Destruction is just beginning  
But you can't feel the pain  
'Cause you disdain the truth

Do you really wanna sniff your life away?  
Being alive without living it's a shame!

When it hits you it seems good  
Taking all the pain away  
Creating a safe and cozy place  
But in a flash it's all gone

Back to reality you feel how much it hurts and destroys  
But you can no longer live for real, kill yourself, no big deal  
There's no way out to you!
