There goes my girl  
there goes my first love  
With the guy I used to call my friend  
There goes love I thought would never end  
And I can't forget her  
my heart is breaking  
When I see her holding hands with him  
Can't help thinking how it might have been  
She's still my first love.

My first love is still around. She never left this part of  
town  
Now I see her most ev'ry day but she don't look my  
way.  
There goes my first love with the guy I used to call my  
friend  
...  
She loved me but not for long. I wish I knew where I  
went wrong  
Now ev'ry day those pretty feet come walking on down  
the street.

There goes my first love with the guy I used to call my  
friend . . .
