Understand that your words are just empty threats.
And for change to begin it's up to us to fight.
Insurgence is within our right,
But our forces are sure to be met.
Organization is the key, understand?
It takes more than to be in a band.
We must have the courage to act,
and take the fight to the streets.

You have a voice --- Express your anger
You have a mind --- Deny Their power
You have two eyes --- know your enemy
You have one life --- the choice is yours!
