On a friday you went away
you left me alone I couldn't make you to stay
You said that you'll never forget me
but I'm sure you will do soon
But I'll never feel the way I'm doing now - 'cause
you raped my mind
What about our dream we were taking 'bout - I can't
leave it all behind
I miss your kisses and your smile - Why don't you feel
the way I do
Why can't it be easier

I know that everything could be alright
If you want it then just lay down right here by my side
We do the things we had no time to do
Will you believe in me like I believe in you

I wish you were here now so I can hold you tight
Caress your body kiss you lips at daytime and at night
I miss you so much more than any words can say
Maybe someday you will change you mind and stay
