Seven keys, formed in a circle
Power of the cosmos focused into their hands
Fiendish army, from beyond the black
Descendants of darkness, aaattaaaccckkk!

The stars themselves, begin to align
Degeneration, in the palm of your hand
Conjured demons, slaughter Earth's inhabitants
Humanity, won't see the morning light

The clouds surround the moon and devour
In search of an antiquity in the shape of a key

The evil watches over you and waits
A formless void with darkness covered face
Collecting of the seven ancient keys
Scattered across time and endless space
The last key is hidden here on Earth

Protected by the chosen one
Collector chases the protector
Until the end of time.. time.. time.. time ..

Sacred blood of the crucified
Passed from one to the next

The clouds surround the moon and devour
In search of an antiquity in the shape of a key

The evil watches over you and waits
A formless void with darkness covered face
Collecting of the seven ancient keys
Scattered across time and endless space
The last key is hidden here on Earth
Protected by the chosen one
Collector chases the protector
Until the end of time.. time.. time.. time ..
