

Monks of Doom

"Riverbed"

Visit "[Riverbed](#)" on MotoLyrics.com

Underneath the riverbed
Bury my bones in a bucket of lead
Underneath the riverbed
Bury my bones in a bucket of lead

Took my love to the riverside
Took a dip in the river now the river's alive
It's alive!

The creature walks between us
You better run, I think he's seen us
When I dropped my glasses at the bottom of the sea
Well I turned around and saw the creature was me.

Underneath the riverbed
Bury my bones in a bucket of lead
Underneath the riverbed
Shatter my nerves and cut off my head

It's like this:
(instrumental portion)

There's a bug beneath the ice
Behind the labs where genes get spliced
And when the sun comes up to melt the frozen sea
They're going to turn around and see the creature was
me!

Underneath the riverbed
Bury my bones in a bucket of lead
Underneath the riverbed
Shatter my nerves and cut off my head

Look out!
