the moves spikes in two stripes it keeps moving
like turnpikes nothing average like the mastered
assassin
we bring it with too much passion
a new chapter a first page book of life
i got yall s*** to write lookin for your first aid
got burned by the sight the master commanding that
be us
breaking hot have we got an understanding...

CHOURUS x2

we give you what you want we give ya what you like
psyching your life
dub pistols official chemical visual missles
official chemical visual missles

dead is description I'm sick of your issues
hit your skin tissue so fast that the wind whistles
you think your man missed you there really
searching for a gem crystal so dark
its mostly invisible
just hold it close to your physical
i let a cup do it just like vitamins and minerals
follow that S.C.L. ritual hip hoply committed tunes
trailed up on side but why? step two don't let the
energy condition you
rock your own s*** cause now a days so many heads
are tryin to clone this
they lack the genetic components
