Green eyes and chromium trails  
stuck down in Selma jails  
I change my mantra to remote control

She's got the two-step down  
in every honkey-tonk in town  
He's gonna drive a big rig  
to try and crush the Man

I call him cheeba because he's  
alive with the power of Satan  
and all the fresh girls like the way  
that he staggers around  
he says his fingers are made from  
the flesh of his soulless invaders  
and he's the coolest kid in the  
world to hang around
