tell me something tell me something will i die will i die
on a rope tell me something tell me something will i die
will i die?
i wish that you didnt love me no more. ive been dead
for years. wishin' you didnt own me no more ive been
here before.
tell me something tell me something will i die will i die
on a rope(3x) tell me something tell me something will i
die will i die.
no i wont draw the blood from your neck. spill the lies in
your bed. i will give you a holy white rose. cut the
tongue from your head
tell me something tell me something will i die will i die
on a rope(4x) tell me something tell me something will i
die will i die?
i belong to a line of red scent. teach the heart to reflect.
the wound is wise fo primal black eyes theres a scarlet
letter in my chest.
