

Darkening "Silent Souls"

Visit "[Silent Souls](#)" on MotoLyrics.com

In the shades of darkness
Behind the gloomy sun
Silent souls will rest...

Playing the story
Someone else has made
They will break out fast...

One more in a million faces
Their hatred will no longer fade
No longer many graces
The end has already been made
In the lateness of the hour
Stars will fade away
Silent souls will rise...

They will mangle, they will fade
They will kill, they will raise

You scorn death
But you'll never breath again
Cause the silent souls won't let you
