[Intro]

It's everyone's interest and the weather, here it is...

THIS IS THE COLD WEATHER

SO GET YOUR CLOAK AND UMBRELLA

[Hook:]

(THIS IS) The cold weather

Coats and umbrellas

(THIS IS) The cold weather

Cats and dogs, coats and umbrellas

[Verse 1:]

Umbrellas up to the sky

Cats and dogs, those people who call

I hit back before it's twice

As of late these mics don't reach too far

So I kill each bar like it's flashing lights

Tailor made records, my mind name lives on

Cold weather code letters: TMR

It's hard to be stopped when you got a meaning like  
this

I got a plot that's meanin' to kids

I'm part of the rest

I watch Rap City get upset

Kick a hole in my flatscreen

Scream and not check

Then back to the scene of the west

They call me Mister

Don't make tunes for strippers

I'm one of the best

[Hook:]

(THIS IS) The cold weather

Coats and umbrellas

(That's what I mean by now, I'm on my way home)

(THIS IS) The cold weather

Cats and dogs, coats and umbrellas

[DJ Scratching]

Exhale, that was halftime

[Verse 2:]

(THIS IS) The word worth of thousand pictures  
You gotta mock us in tryna get a thousand bitches  
That's how we drop it, to feel regret  
I try to fill it in baguettes  
Stuck on the painting when I picture in the silhouette  
I be the best  
I be great  
I can waste my words or I can say free Tibet  
Or maybe not think so global, but more local  
Like the Lakers better rip anything what's next  
Witty with the words, they never liked it  
So beat me down, but couldn't get the best of Michael  
From next town I came back a new recital  
I shoot slugs from my brain just like a rifle  
They show love, but that's a part of tour  
I play the part and maybe that's the art of war  
Or maybe why I started for, started from  
Either one

[Hook:]

(THIS IS) The cold weather  
Coats and umbrellas  
(Umbrellas up to the sky)  
(THIS IS) The cold weather  
Cats and dogs, coats and umbrellas  
[DJ Scratching till end]

[Outro]

Hi, I'm like an hour away from like an L.A  
And it's snowing in California...
