Not a worry in the world when I started Still young and restless  
Hurry up and wait Tell my people nowadays a missed call is just as good as a message  
Weve come along way from brick phones to flip phones I remember the day my homie  
Freck-one had the first chip phone We was callin long distance runnin up corporations  
tabs Like god damn the world gone mad And little did I know and did he know we was not gonna see the future  
together now here no more (rest in peace) 93 was not til infinity, 93 was more like 20 years of legacy  
In Venice Beach, Santa Monica, Freck-One ring bells Jade-one they know the name well still  
They goin huntin Theres 8 million stories in the city They forgot the 4 million in the country  
I'm going where the people want me (Worldwide) Uh This is the layover airport hanger  
6 hours with a hangover I bang over the best when I fly we goin ride Got my peoples on my side  
Its to the sky (Worldwide) Lets call the whole thing off Nah I call your bluff  
If you callin it luck I'm up to no good, I'm up to something I'm plottin my peoples still  
come first I never pass the buck I never asked for nothing I couldnt get back even during set backs  
I called everyday your doughs on the way When it comes I'ma put something on top  
make sure you get that (with interest) Dont forget about the rain the suns up now  
But when its wet I'm back in my lane Dont forget about the pain I ain't been the same since April 04  
This shit is insane not a game this a limited run Dont second guess an operation from an armchair  
son of a gun Loudest in the room ain't the smartest in the building Quitting while I'm ahead  
ain't the same as quitting is it? (Worldwide)
