I don't want you to touch me  
Don't try to help you'll only make it worse  
Don't tell me it will be okay nothing's gonna be okay  
And anyway it doesn't matter I'm gonna turn my tv  
on  
Cause everything looks beautiful on video

No point in talking now I'm gone  
I have escaped I can't ?  
My eyes don't see the world at all  
My ears don't hear the things you say  
I want to turn to light  
I know that is where I belong  
Electrify the airways I'm on video

And if you need me switch me on  
I'm always right behind the screen  
I'm beautiful forever now  
I'm living thirty-minute dreams  
And if you want me switch me on  
I'm living right beyond the screen  
The only place I feel at home  
I am your thirty-minute dream

Oh you can never touch me  
Don't even hope you'll only want too much  
I know that you can look away  
I know that I can keep in touch  
And when you dim the light  
You know I won't be gone for long  
I will live forever here on video

Electrify the airways I'm on video  
You're so cruel to ever look away

Somebody will love me here on video  
I will live forever here on video  
Everything looks beautiful on video  
You're so cruel to make me look away
