From the moment
You admit
That your life will never be the same
Did you know
The way to go
And I'd only want to come around
Through the days and the night
And the walls are closing in on you
Don't look back
Don't hold back
and just drink what you want to

All the time
passed me by
and all I said I'd rewind
Too young to
Just twenty two
I know you've got to pull through

I'll take this battle head on
Been down here
For too long
I'm feeling lost and confused
And I'm left
Broken and bruised
and I'm doomed

---To what it's like
And you be very close to your heart
Sometimes we
Dissagreed and I'm flattered by the thing you say
Don't give up
Fill your trust
And stand for what I've always told you
Your my star
Think about art
And just build yourself a good---

Anything you
Want to do
Is possible, it is true
Just bring me

The good news
Don't want to hear you confused

All the time
passed me by
and all I said I'd rewind
Too young to
Just twenty two
I know you've got to pull through

I'll take this battle head on
Been down here
For too long
I'm feeling lost and confused
And I'm left
Broken and bruised
and I'm doomed

And I know that I said your my friend
And I'll be there right til the end
Don't want you falling down
I just can't see you right on the floor
And I know when I said you're ----

Got to grab things right by the balls
And deal with all the stress and all the faults

All the time
passed me by
and all I said I'd rewind
Too young to
Just twenty two
I know you've got to pull through

I'll take this battle head on
Been down here
For too long
I'm feeling lost and confused
And I'm left
Broken and bruised
