I got your note the other day  
Telling me it was coming back  
All the feelings you thought were gone  
Are flooding in  
So you thought it was over  
Cause you never sent the invitation

All your thoughts throw you on the floor  
And the toll they take tears you to the core  
But you thought it was over  
You thought it was over  
So you're sitting here all blue in the face  
With your fingernails pale like the child next door  
And you thought it was over  
Oh, you thought it was over

I know where you've been my friend  
Been through it more than I'd care to share  
And you think you're the only one  
So you thought it was over  
Cause you never sent the invitation

All your thoughts throw you on the floor  
And the toll they take tears you to the core  
But you thought it was over  
You thought it was over  
So you're sitting here all blue in the face  
With your fingernails pale like the child next door  
And you thought it was over  
Oh, you thought it was over

Someday we'll know freedom like He said we will  
Someday we'll know freedom like He said we will  
Someday we'll know freedom like He said we will  
Someday we'll know freedom like He said we will  
Today  
Today  
Today  
Today
