"Fade Away"

Visit "[Fade Away](#)" on MotoLyrics.com

All by yourself alone at night. Thinking to myself I know
you wanna
cry. Let me tell you nothings the same I can feel it deep
inside the
devils driven you away.
Fade away forget everything, fade away forget
everything.
My mind wants to play life seems meaningless I must
say and I
know its wrong to feel this way for so damn long and
you can
numb my brain. If you can cure my pain. Afraid to lose
don't
wanna fight I just might.
Fade away forget everything, Fade away forget
everything.
But you might see what lies within me and you might
believe that
all is meant to be, but why, why should you and I
Fade away forget everything, fade away forget
everything.
