The stress has started and it won't end  
The waves of madness come pouring end

Chorus:

Do you think that I care?  
When the hammer comes down  
You must be mistaken me  
For some kind of clown

Sick of being alive frustration sets in  
Pain and depression is his only friend

Chorus

Doomed vision forever death is in your eyes  
The bullets your master when will you realize

Doomed future forever death is in your eyes  
The bullets your disaster when will you realize

With a bullet  
With a bullet yeah

Pull the trigger if that's what you think  
It won't mean nothing to me that your fucking weak

Chorus

Doomed vision forever death is in your eyes  
The bullets your master when will you realize

Doomed future forever death is in your eyes  
The bullets your disaster when will you realize

With a bullet  
With a bullet ....oh yeah, yeah

The stress has started and it won't end  
The waves of madness come pouring in
