

Monty Python "Galaxy Song"

Visit "[Galaxy Song](#)" on MotoLyrics.com

Whenever life gets you down, Mrs.Brown
And things seem hard or tough
And people are stupid, obnoxious or daft
And you feel that you've had quite enough

Just remember that you're standing on a planet that's
evolving
And revolving at nine hundred miles an hour
That's orbiting at nineteen miles a second, so it's
reckoned
A sun that is the source of all our power

The sun and you and me and all the stars that we can
see
Are moving at a million miles a day
In an outer spiral arm, at forty thousand miles an hour
Of the galaxy we call the 'milky way'

Our galaxy itself contains a hundred billion stars
It's a hundred thousand light years side to side
It bulges in the middle, sixteen thousand light years
thick

But out by us, it's just three thousand light years wide

We're thirty thousand light years from galactic central
point
We go 'round every two hundred million years
And our galaxy is only one of millions of billions
In this amazing and expanding universe

The universe itself keeps on expanding and expanding
In all of the directions it can whizz
As fast as it can go, the speed of light, you know
Twelve million miles a minute and that's the fastest
speed there is

So remember, when you're feeling very small and
insecure
How amazingly unlikely is your birth
And pray that there's intelligent life somewhere up in
space

'Cause there's bugger all down here on Earth
