"D Generation"

Visit "[D Generation](#)" on MotoLyrics.com

The envy and ignorance
That feed the masses
Can't stop my painful
Way to elevation

Beyond good and evil
Beyond the old certainties

Trying to fill up with the will
The abyss born by death of God
That God created by our hopes and fears
That God so human cause made in our image

Beyond good and evil
Beyond the old certainties

Like the rain that slips away
From the shoulders of ancient statues
So the laws that rule the common people
Cannot touch the New Man

Time, the time is come
To taste the Will
Evolution or decadence
Are you strong? Strong enough?
To defy the human's weakness

Trying to fill up with the will
The abyss born by death of God
That God created by our hopes and fears
That God so human cause made in our image
