You take my breath and I'm scared half to death that
you'll leave
I'm yours heart and soul and I'm begging you come
with me please

Lay with me under the stars
Look in my eyes
Promise you'll never let go
Stay with me all of your life
Until the end of the world
If only tonight... say til the end of the world

Tell me the truth and I'll prove that this love is for real
I'd write it on stars if the scars they would give me
would heal

Lay with me under the stars
Look in my eyes
Promise you'll never let go
Stay with me all of your life
Until the end of the world
If only tonight... say til the end of the world

Say it's forever I know you would never regret
I'd go through hell if a kiss is all I would get
Say it's forever I know you would never decieve
Don't leave me hanging I'm begging you come with me
please

Come hold me closer and melt in the warm autumn
breeze
I'm yours heart and soul and I'm begging you come
with me please...

Lay with me under the stars
Look in my eyes
Promise you'll never let go
Stay with me all of your life
Until the end of the world
If only tonight... say til the end of the world
