Talk to me baby, I want to sleep at night  
My heart is heavy, it's weighed down by the night.  
And now I'm lonely, I want to see the light  
So deep within you.

Cool wind is blowing through your crazy hair.  
Warm colours flowing, this feeling we have shared.  
And now I'm lonely I want to feel the love  
So deep within you.

Your love's a never-ending dream  
A castle by a stream of sweet understanding

I know you're thinking of me too, the messages  
>From you are my inspiration.

Love's incense lingers, it never fades away.  
Like you I'm waiting for our special day.  
And now I'm lonely I want to feel the love  
So deep within you

My love is burning, like a forest fire  
My heart is yearning, I feel a warm desire.  
And now I'm lonely I want to touch the fire  
So deep within you.
