"The Fight"

A perfect face won't get you anywhere
It's ego and it's not our problem
If you would say I can make it anywhere
I can make it anywhere
You can fly and I'm no sycophant
Although you can't accept it
Have you tried to see it my way
To see it my way
Hey yeah hey hey
It's the fight I've come to like
Say it soft if time is everything
I heard it dies with every word
I would have fought to take in everything
To take in everything
Hey yeah hey hey
It's the fight I've come to like
And so am I at fault
I know it's never
So one more chance to be here anonymous
Hey yeah hey hey
It's the fight I've come to like
And so am I at fault
I know it's never so
