Down the meanders of myself  
to be mirrored in my soul  
I have seen the ancients  
I am ready to receive and possess the knowledge  
order born of chaos to end in chaos destined to raise  
new order  
this is the eternal strain that balances the cosmic  
forces  
the eternal strain that makes human beings vibrate  
I know and dream in absolute secretness  
and finally born my inner flame of extreme devoutness  
I need to run along my way

my life complies with the Moonsky - Diana-Ishtar Nana-  
Lilith

the great goddess triumphant bestower of joys  
with her meantalions and grace

She's my goddess  
the goddess of the ancient age  
the overthrow of oppression the pride of the looser  
my life complies with the corpse of the sun  
Lucifer the morning Star the first opposition the birth of  
life  
I've reached my inner peace the life I always sought  
a long calvary into the imagination  
mirrored in reality

the journey has now begun into the parallel dimension
