Everything You Always Wanted To Know About The Music Business Â© 2009 Frederick Rousel

Do you really think that all the records you buy
Came from some kind of thing the sky
Do you believe in all the artists you love
Did they get their money from a power above
Is that a mansion and 15 cars
Where did they get them
Maybe from Mars
All of your favorite little idols are there
Caus a real big business put them there
Even those kids that sing on the screen
They last 2 seconds in the limousine
They sing a cover version and it does real well
Then the big fat label says "FAREWELL"
The car company phones up, they wanna advertise
But you're there singing with your head in the sky
I'll make sure the ratings are really high
Then I'll sell more cars while the winner cries

There's winners and losers but who owns the game
The whole damn nation wants to know your name
I know it's lonely when you're struck with fame
But true stars are balls of fire up close babe

There's winners and losers but who owns the game
The whole damn nation wants to know your name
I know it's lonely when you're struck with fame
But true stars are balls of fire up close babe

There's winners and losers but who owns the game
The whole damn nation wants to know your name
I know it's lonely when you're struck with fame
But true stars are balls of fire....up close babe
