"Mote"

Visit "[Mote](#)" on MotoLyrics.com

And you feel the spiral turning for you alone
And you feel so heavy that you just can't stop it
When you see your madness turns you into stone
A picture of your life she's like a rocket
All the time
Could be if you're crazy it's all right
I see you moving in and out of sight
My friends tell you it'll all come through, yes
From nowhere
To nowhere
Come together
Come through

Have I lived now with a mote inside my eye
And I can't see you breathing as before
I am airless, a vacuum child
And I can't stand to reason at your door
In this time

Could be if you're crazy it's all right
I've seen you moving in and out of sight
My friends tell me it'll all come through, yes
From nowhere
To nowhere
Come together

I'm down in the daytime out of sight
Coming in from dreamland I'm on fire
I can see it's all been here before
Dream a dream that lies right at your door

When the seasons circle sideways without a turn
And words don't speak just fall across the carpet
You're just in time to watch the fire burn
It seems a crime that you face it like you love it
All the time
