sitting on two lines tonight, lets keep this silence to
ourselves, and tell everything, you've got my attention
she said, forget about him, im all ears,

scream the words to me, tell me all about, your dream,
i wont say a word i swear, i promise im all ears,

played my part in these conversations, where words
will mean the most, over the phone.

scream the words to me, tell me all about, your dream,
i wont say a word i swear, i promise im all ears, im all
ears,

here we go into the night
