[guru]

All, all.. let's get together now

This is the time for gettin fresh for the weather now

Seek the sheik speakin, and those keepin the faith

We won't have to hesitate

We just skate, straight, into the heart of it

This is the scene and I'm the dean and here's the start
of it

So see how things should be, and come along with me

Agree with this decree, and let your conscience be free

"let your conscience be free" --> erick sermon

* cut n scratched by premier *

[guru]

Release me, ? me, so I can set it off

And if your body's feelin hottie won't you sweat it off

Flow and go, farther, because we are the

Crusaders -- so you know we can create our own fate

Great, let's get into it now

Ain't nothin to it but to do it now, fluent now

Word, you heard, this is the verdict now

You can shake it don't you break it don't you hurt it now

Flex, bend, and twist, into a motion of

Just bein down with the sound -- I'll give a potion of

Vocab, so go grab, the one of your choice so

Then you'll feel good like you should, and you'll rejoice
so

See how things could be, and come along with me

Agree with this decree, and let your conscience be free

"let your conscience be free" --> erick sermon

Girls, girls.. these are the details

I like sophisticated, liberated females

Dutch, treat, I have no qualms with it

Your shape is neat, and I'd like to grace my palms with
it

Clocked the suave talkin, you won't be walkin away

Because I know that you'll stay

For my play, and sway, to rhythm pumpin baby
You must admit this is legit and you'll jumpin maybe
Hold up, wait up, and don't get too excited
For genuine is the line while others you invited
Time for rhyme makin, and never fakin the move
So get involved with the groove
While I prove, smooth, that's how I kick it to you
Because with all the respect, I wanna stick it to you
See how things could be, and come along with me
Agree with this decree, and let your conscience be free

"let your conscience be free" --> erick sermon

What's up, what? I am continuin
All the chumps and the punks, I'll do em in and then
Pose for those lookin, that put the crooks in the cell
Cause they're the wrong personnel
I propel, swell, and I start blowin up
All the babiess ones they should be growin up
Bright, lights, I'm shinin on you now
This is the time and the place, peace be upon you now
See how things could be, and come along with me
Agree with this decree, and let your conscience be free
Let your conscience be free

"let your conscience be free" --> erick sermon
