(Powers/Ebz)

Your fate was sealed with my kiss  
I bet you never thought that it would end like this  
Your death at my birth left me the keys to this earth  
When I left the womb - yeah you hit the tomb  
With blood as my first sight and your death my delight  
It was predestined and clear that I would be fear  
Your security's smashed - now what can you do  
The knife in your back twists your authority - it's  
through  
Knives - Knives - Knives - Knives in society's side

Knives - Knives - Knives - Knives in society's side  
Knives - Knives - Knives - Knives - Knives in society's  
side

Dagger back in my scabbard - I sit back and laugh  
I feast with my empire colored red by your bloodbath  
Knives - Knives - Knives - Knives in society's side

(Solo)

Knives - Knives - Knives - Knives in society's side  
Knives - Knives - Knives - Knives - Knives in society's  
side
