"I"

I am the void of light, silence, I am the dawn of time
I am the all you see, emptiness I am the non
I am the air you breathe, treachery, I am your wine
I am the soil and seed, mundane, I am the in between
taste of my knowledge
come bleed me weak

of my force feed
drink of my power

breathe of the mist dine upon divinity
our return is now
from the earth and wind

forever and now again
voice of the ancient ghosts
now your chains are stripped away

I am the void of light, silence, I am the dawn of time
our voice is one
taste of my knowledge
I am the soil and seed, mundane, I am the in between

dine upon divinity
come bleed me weak

from the earth and wind
our return is now
now the chains are stripped away
