

Ghost Vs Sanne "A Little Love"

Visit "[A Little Love](#)" on MotoLyrics.com

We're building a prison.
We quarry the stones and carry them home so they can
bury our bones.
The brothers are bleeding and the sisters are crying
when evil's feeding on hope that's dying.
Those who are strong they move up front, but all we
hear is the enemy grunt

// We all need a little love to get our feet back on the
ground.
We need to give a little love before we all drown.
We all need a little love if we are going to survive.
We need to give a little love if we're gonna stay alive
//

Oh, put us together 'cause we've fallen apart, just
trying to cope.
That won't mend a broken heart.
We say that it's wrong, but then we do it again we
painted this picture until it got stained.
Help me break through the crust before it all has died.
Help me scrape of the rust and trust our inside

// CHORUS //

Could someone show me how to let go how to sit back
and just watch it grow.
Help me sense the vibrations and get rid of all the
frustrations.
I know that I'm weary but I can be strong 'cause I
refuse to let right lose to wrong.
It's gonna take some dedication but I'm gonna
reach my destination

// CHORUS
