"The Music We Hear"

Visit "[The Music We Hear](#)" on MotoLyrics.com

Sometimes I get a feeling good but greed gets me
down
I try to think about the highs the freedom we found
When the business in your life don't sit with your soul
And they treat you like a child they need to control

The music that we make we hear or it understates and
leads us
The music that we hear is always standing near to feed
us

We're all gonna rise above all things that we lack
Good vibrations that we make will come down sit back

The music that we make we hear or it understates and
leads us
The music that we hear is always standing near to feed
us

The music that we make we hear or it understates and
leads us
The music that we hear is always standing near to feed
us

The music that we make we hear or it understates and
leads us
The music that we hear is always standing near to feed
us
