"Poisonated Love"

your eyes
your smile
your scent
makes me wanna fly
in the deepest sky
where i see a limbo
waiting me to go
where i can see deep green eyes
a face with smile blooded with red
where there is no word as "cry"
and no one can shut me ahead

that place is named "you" my dear
if i want a shortcut it's near
wich is your heart my fear

and once i get there
i'll never wish to wear
anything but your hair

this song wich i wrote
it looks like few words
it's true, but inside of each word
there is a hole new world
and that strange world is called
the POISONATED LOVE... (to be continue...)
