Look Down

The sun, comes up
And don't you know what's coming up next?
Woke up, fucked up
It started off staring in each other's faces

I'll be the man that tells you to your face
That your love is a phase yet
I'm loving the way you taste.
I wish I could fly...
And look down upon you from way up in the sky.

I know. You know.
That I, I honestly don't know
Which way to go
Which way is farthest away from you.

The sun, comes up
And don't you know what's coming up next?
Woke up, fucked up
It started off staring in each other's faces

I'll be the man to tell you to your face
That your love is a phase yet
I'm loving the way you taste.
I wish I could fly...
And look down upon you from way up in the sky (x2)
