\* [VERSE I]

There's no turning back- I left my home burning in  
flames this morning  
Knowing the day after creates a new day dawning  
This is the season of the non-conformist  
The arms race where the hare is beaten by the tortoise  
More like the bald eagle getting' scalped from within  
his fortress  
The higher purpose issues  
Put this in your headline news  
The hateful man from Iraq  
I wrap  
a long stem of thorns around the heartland of America  
Achy  
Breaky  
hate me  
scarin' ya  
Okey  
Dokey  
Oklahoma bombing blame me  
Suspect unknown stereotype and name me  
Then you wonder why we extremists  
we dealing with a nation run by demons  
Concocting devious government bodies, F-U-C-K  
all your D.E.A.'s  
and F.E.M.A.'s  
Your regime  
means  
to steam  
roll all opposing themes  
Those with the slightest melanin in genes  
always considered the away team  
Foreign policies transform into broken promises  
Can't even fathom exactly what honest is  
Dirty rotten lowdown scoundrels dispense the cruel  
promise blacks 40 acres and a mule  
All they got was 40 ounces and a stool  
Description of existence- life's a bitch and breathing's  
for fools  
tragedy rules  
Inhale gas and choke on toxic fumes  
Blue skies tremble at the mercy of grey smoke from

fossil fuels  
Did we all want chaos to run amok  
Livin' a vampire's life  
Reality bites and blood sucks  
'Til your zombie like  
and don't give a fuck  
But that's all gonna change now

[VERSE II]

Never exercising their rights- freedom of speech  
atrophy  
Fear of conflict with bully big brother watching breeds  
apathy  
Torture loyal citizens  
of this wicked system/ leavin' 'em with severed tongue  
Let freedom ring but it never rung  
Mute affluent bums  
force rambles  
of shabby renditions of a national anthem left in  
shambles  
Half-hearted patriotism  
Parents now slaves to their children  
Columbine high school reunion sensationalism  
21 gun  
megaton  
atomic salute  
for this government and its self-destructive attributes  
Chickens coming home to roost  
This act you call terrorist provides third world populace  
with ego boost  
Aggressions eliminate possibility of truce  
Us considered minority but you comb the streets for  
new recruits  
Uncle Sam your nephews wanna show what you've  
trained them to do  
Stress blue collars in the name of increased tax  
revenue  
Children work their fingers to the bone in sweatshops  
Rest at night in mud huts  
Adolescent have-nots  
nourished in economic cell blocks  
acquire nutrition from well developed in god we trust  
blood lust  
They claw, scratch  
and scrape for scraps  
Asthma grips and grabs  
hold they breath with iron grasp  
until they lungs collapse  
Sick and tired choosin' lesser of two evils in ballot box  
booby traps  
Behemoth industrial complex shall be made simpler

The world ends with a bang as you whimper

[VERSE III]

My reasons for doing this are noble  
The grievances of my people must be made vocal  
This global  
world cursed with the same destiny of Chernobyl  
Under their fearful breaths they sing songs of freedom  
Each individual aware the greater good supercedes  
'em  
A powerful peace comes over your grand cities  
Rebels in the trenches doing the dirty work with hands  
shitty  
No sympathy for Mephisto the oppressed won't ever  
grant pity  
Beware, be cautious  
Armed forces weakened by heavy losses  
Police departments blown to bits with countless  
grenade tosses  
Poisonous chemicals spewing from faucets  
got the upper class feeling nauseous  
Nuclear winter the coldest equalizer  
Racist power structure destabilizer  
What if the wretched victims of imperialism were to rise  
up  
The ignorant were to wise up  
Underground radiation shelters too quickly use  
supplies up  
New World Order conspirators break their ties up  
Revolutionaries organized crossed their T's and dot  
their I's up  
The greatest opposition to liberty were sized up  
Flip the Earth like a coin, hope for the right side up  
Self-defeated suicide down war criminal homicide up  
Global warming melt polar caps and raise the tide up  
What would you do? Time's up

BOOM
