My mind realizes what is happening today,
I want to know the truth ,
that' s why I don' t look away !

Manipulations -
used by governments.
Results of science -
informations are hold back.

Beings of another world,
did they land on earth?
Falses in viruology,
people wouldn' t it be told.

Results of science -
informations are hold back.
A virus escaped from research,
people die without protection.
Diseases all over the world,
caused but never told...

Condemned Truth

Let your mind work.
Think about the truth.
Think about your children,
they must live on this earth !

Diseases all over the world -
People die without protection !
