Breathe deep, you're free to speak,
You're free to walk, you're free to
seek.

Forever free, watch what you say.
Watch where you walk, we're
confined away.

Are we free like they say?
Are we chained down in Hell?
They tell us that we're free.
It's sure fuckin' hard to tell!

Confuse the masses, disillusion
they will make,
Behind our backs our powers they
will take.

Machine lives, Machine works,
Machine thinks, Machine rules.
Man he tries, man he cries,
Man he shrinks, man he dies.

Are we doomed, do you think?
Are we destined for disaster?

Does it even matter?
Machine rules, he's our master.

Confuse the masses, disillusion
they will make,

Behind our backs, our powers they
will take.

Confuse the masses, disillusion
they will make,

Behind our backs, our powers they
will take.
