The sun is rising in your face
The sun could get no better place
Everything is bright and clear
Whenever I wish you were here
It's a dream or is it true?
Finally it all comes true
I run my fingers through your hair
We've got so many things to share

You must be caught in heaven
Setn back to guide my way
You must be caught in heaven
Now I'll never get over

You got me laughin like a child
When we make love so deep and wild
How do I deserve that soul?
Love to play the perfect role
And we'll be dancin in the rain
So you can wash away my pain

You must be caught in heaven
Sent back to guide my way
You must be caught in heaven
Now I'll never get over

I'll let you in
And we'll begin
To rule the world (2x)

The sun is rising in your face
The sun could get no better place
And we'll be dancin in the rain
So you can wash away, can wash away my pain

You must be caught in heaven
Sent back to guide my way
You must be caught in heaven
Now I'll never get over
