[Verse 1]
I would dig and dig and dig
'Til I was abstract, I'm not myself again
Who will miss us when we're gone?
Only time will tell, of what's built around

[Chorus]
There's no escape from this damage we've done
Remember to forget why you came
I'm left for dead in my hometown again
So remember to forget why you came

[Verse 2]
I would love to hang my head
'Til this was over, so we are finished with it
Lack of confidence is well known
Someone that I am, there is no use to run
We're fenced in, there is no use to run
We're fenced in

[Chorus]
There's no escape from this damage we've done
Remember to forget why you came
I'm left for dead in my hometown, again
Remember (oh remember)

[Bridge]
So when you disappear, do you run with angels?
Are you safe without fear?
So when you disappear, do you run with the dogs?
Yeah, do they lick your wounds?

[Chorus x2]
There's no escape from, the damage we've done
Remember to forget why you came
I'm left for dead in my hometown again
So remember to forget why you came
